eCOLE
Education Management System

Intelligent Delivery of Knowledge

eCOLE is a completely web-based Education Management System built for colleges, institutes, schools and training divisions who seek to maximize the benefit of Information Technology in the Wired Age. eCOLE consists of a comprehensive set of tools that enable the institute to cover a range of activities from Student Enrollment to Payment Management to Attendance Rosters.
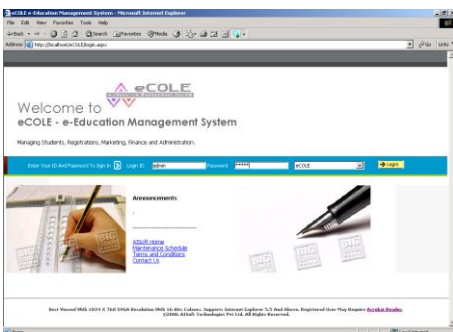

eCOLE automates the activities of an Education Institution such as Student Registrations, Employee Management, Student's Fee generation, Prospect Management, Medical Check-up details, Attendance entry, Marks entry, Library Management, Inventory of Books, Transportation. The system also takes care of generating reports like Progress report, Annual Examination Results to be submitted to the ministry, student admission details, subject allocated to teachers and so on.

- **Total computerized management of the institute as a whole, and of the individual centres**
- **Enable key offices in the institute to access and mine through critical data so as to make better informed decisions**
- **Provide an environment for virtually monitoring students**
- **Reduce paperwork and time spent in administrative processes**
- **Reduce Data Redundancy**
- **Reduce overheads in cost across the institute**
- **Facilitate quick dissemination of material within the community**
- **Maximize the use of the Internet and Intranet in Management**
- **Create an Information-Centric Organization**

- ◆ Security and Permissions
- ◆ Document Management
- ◆ Reporting and Analytics
- ◆ System Management

e-Learning System

As an add-on to eCOLE, we also provide our Learning Management System – OCTAL. **OCTAL** stands for *Online Collaborative Teaching and Learning*. OCTAL is a Learning Management System that combines the best parts of a Computer-based Training (CBT) and Web-based Education System. OCTAL intends to provide students and teachers with the best standards in online and virtual study environments in the form of holistic content administration tools, guided tutorials, multimedia-enabled lectures, automated reporting, and personalized teacher-pupil interaction facilities.

OCTAL enables an institution to effectively and uniquely deliver educational content by creating a virtual classroom. It offers the opportunity to maximize the potential of the Internet/Intranet in running Academic and Professional Training.
